## HSS Holesaw

High speed steel hole saws leave very clean, round and accurate holes in steel and alloy sheets up to 2mm in thickness. They are much harder and durable than high carbon steel hole saws, but are not anywhere near as flexible. They are most commonly used for specialised professional use such as electrical installation work. For use in hand held Drills or drill press.

**Supacut Wood Blades with narrow kerf, require less horsepower to run while saving valuable material. Great for lower-powered machines like portable table saws. Thin kerf blades generate up to 60% less sawdust than traditional blades, sending fewer emissions into the atmosphere and providing a safer environment for your workplace. This hand-tensioned and balanced blade will provide excellent performance and durability.**

Supacut Aluminium Saw blades provide fast, smooth cuts with less drag and less waste. The aluminium/plastic blade with its "Triple Chip" design is ideal for cutting extremely hard wood, aluminium and laminate material with less chipping than a normal wood blade. This hand-tensioned and balanced blade will provide excellent performance and durability. Use them on non-ferrous metal, plastic, laminates and hard wood where a chip free finish is important. Please note when cutting Aluminium a wax lubricant must be used.
